Title: Personal Portfolio Webpage

Objective: To create a simple and responsive personal portfolio using HTML5, CSS3, and JavaScript.

Design Choices:

- **HTML5:** Used `<header>`, `<section>`, and `<footer>` for better structure and readability.
- **CSS:** Styled the page and added hover animations, transitions, and a responsive layout using media queries.
- **JavaScript:** Added dark/light mode toggle and smooth scroll functionality for better user interactivity.
- **Bootstrap:** Used for grid layout, navbar, and responsive design with minimal code.
- **Responsiveness:** The layout adjusts properly on both desktop and mobile screens.

Technologies Used:

HTML5, CSS3, JavaScript (ES6), Bootstrap 5.
